

# Edgehasp 2010 Version

## PORTABLE

Hi, first off I'm running Vista Ultimate 64bit, and I've just downloaded the edgehasp 2010 version straight from the edgehasp website and placed the file in the same folder as the 2010 dll. I've tried running the 2010 dll but it's not updating the hasp version (It gets stuck on the connection part). I have also tried pasting the dll into Programs and Features but that doesn't help either. To sum up I've got the edgehasp 2010 dll, the 2010 hasp dll and the 2010 version of hasp for Vista 64 bit. Please help!

Despite treatment with isoniazid and a macrolide, granulomatous disease developed. His condition resolved with a macrolide-containing regimen that included rifampin.
