One of the common uses of Photoshop is to add finishing touches to a photo. The best way to do this is to use the features of the software. Fingers and toes are very small on Photoshop's canvas so there are fewer options for tweaking details. Instead, you can use special tools to build color layers and divide areas of your photo into zones. The Layers panel provides a great tool for the job: drag the lines below your image to create sheet masks that let you select a particular type of content. These masks can be used in a number of ways (for example one can be used to hide images on the background of your document). Smart Objects now have an easy way to share. Just click the Share button in the Layers panel and you can save a version of the object just for sharing. The tool supports layers, page fills, shapes, text and raster images. Our image library was first introduced in Photoshop CS4; that's when we started to put a particular focus on both simplicity and speed. Since then we've refined the workflow, spend more time in the Layers panel to give you more precision and speed (making it possible to apply multiple adjustments to a photo in a single click), and added new features like Smart Objects, that allow you to share and easily move, enhance and share a selection of an image. And with the introduction of Share for Review we gave you a way to send the edited and tested assets to reviewers, allowing you to preview your work in a collaborative environment.

There are many different jobs. Businesses thrive when they offer a competitive advantage. Employees are a great way to do this. Companies have employees because they need someone to help with the work. The real reason companies hire employees is to find good people to work together. HR people often try to describe the reasons your business hires hires employees. They usually have to find a way to convince potential employers that they are worth of promising a job for the companies and the packages they offer. In many ways, you must need employees to be competitive. Businesses are wise to hire employees. Hiring is an investment. The detailed information that you need to become proficient with Photoshop can be found in the Help menus. The most useful menu items include:

- **View & Window** - This button opens or closes the main Photoshop window. The **Menus** - and **Windows** menu items increase the rows of tabs on the window, the columns of tabs on the window, and the level of detail that can be seen when the mouse cursor hits the tabs.
- **View & Window** - This button moves the cursor to the next tab in the window.
- **Menus** - and **Windows** menu items change the order in which the tabs are displayed, and the order in which the toolbars are displayed. The **Working** tab will allow you to make changes to any document or image that you have open. You can also change the size of text, and select the text and place it in a new location in the **Layout** tab.
- **Window** - This tab is used to access the documents or images that are open in the **Windows**, the layers that are open in the **Layers panel**, and the paths that are open in the **Paths panel**.
- **View & Window** - This tab will change the defaults that are set by the **Windows** menu and **Menus** menu items, unless you have selected otherwise in the **Options** menu.

The Ultimate Photoshop Best Books Award This year's Horizon Report shows that about 4.6% of

wearable items on the market are using AR or VR: and 20% to 30% of smartphone users wear glasses. So as a result, we're bringing together some of the most exciting new technologies from Samsung, Google and Apple. When the team is creating images for an app or game, they need a little more than a traditional camera. Smartphone cameras have become quick, easy and handheld — perfect for sharing photos and videos on social media. But phone cameras lack the detail of professional cameras. That's where augmented reality comes in. Combining a smartphone camera and a screen, the HoloLens lets you see your photos and videos—right in front of you. You can choose amazing scenes to see life like effects on your photos, play games with your occluded surroundings, and catch everything that passes your front-facing camera.
